

Overhauled seat underframe
of a Mechatronik luxury seat
for a W111 with heated seats

Mechatronik seats for selected Mercedes-Benz classics

You're tired of uncomfortable journeys and annoying backaches, especially on long trips?

Then you have come to exactly the right place...

In our very own leather shop we construct tailor-made luxury seats with great craftsmanship for you and your Mercedes Benz oldtimer.

The seats that we build are specially fit to your height and your weight and cannot be distinguished from the original in their appearance. Yes, you can even retain the original covering, if you like! You will first notice the difference when you sit in the seat that we have constructed in accordance with orthopaedic aspects: the lower leg rest comfortably, the lumbar vertebrae are properly supported, the lateral support is better – concisely, you're sitting first class.

Come see us and "try on" your new seat. You'll be delighted! Plus you will feel safe and comfortable in your classic in future, even on longer journeys!

Cannot be distinguished from the
original: the luxury seat of a W111
with heated seats

Original, unrestored
W111 seat underframe

Specially layered foam understructure
of an orthopaedic seat, individually
fitted to your weight, height and
sitting position
