

With interior leather-covered GRP housing for the 2-way front system for a W113 (as well as optional painted loudspeaker covers)

Mechatronik Sound System "eco"

- Front system: 2-way front system MHB16B with self-designed, specially shielded frequency-separating filter
- Subwoofer: GRP box with two HBSW 16 mini-subwoofers, custom made
- Power amplifier: "High-End" 4-channel amplifier
- Capacitor: 1 Farad

Mechatronik Sound Systems for W113, W111, W109 and W108

Would you like to have excellent listening pleasure in your classic car without having it leap right out at you?

Then you are in good hands with us...

One thing up front: All the components of our "base", "eco" and "pro" systems can be removed again without being noticed. In the foot space of a W113, a 16 cm 2-way "High-End" system is built, for example. In the area behind the seats there are up to two GRP subwoofer housings, each equipped with 2 16 cm mini-subwoofers.

The right subwoofer housing is shaped such that it can accommodate the 4-channel amplifier – everything has its place and is perfectly tidy.

The result is much more than something to listen to...

"High-End" in retro style: appropriately designed navigation radio Becker Mexico 7948

Solid red casted ring for 16 cm loudspeaker with screwed in plate on the original mount points
